

EPA decision not to close Geneva Steel has bounced

By BOB SALLANDER

Utah State Staff Writer

Geneva Steel will not be closed by the EPA, a government official announced Tuesday.

"With an agreement this close, EPA is not willing to allow a settlement to slip away," Roger Williams, EPA regional administrator, said in a written statement. "We are willing to go to the extra mile to insure Geneva remains open while reducing its impact on the health of Utah's citizens."

Williams said the EPA has contacted U.S. Steel executives and offered to move negotiations to Pittsburgh.

He said he has received "hundreds of letters" from Utahns concerned about a closure of the plant.

"Nearly all the letters contain a sincere emotional plea to not shut down the facility," he said.

Williams said the letters also stressed support for a clean and healthy environment.

The EPA and Geneva have been debating over the economic and environmental consequences of a federal air cleanup plan estimated at \$108 million.

The steel plant is under pressure to meet a December 1982 deadline for curbing emissions, but Geneva officials say the plant cannot implement the federal plan and still make a profit.

Plant officials made a counter proposal that was incorporated into Utah's air quality plan but it was rejected by the EPA. The federal agency said all available technology for minimizing cleanup was not included in the proposal.

EPA officials say the Federal Clean Air Act requires that all available technology be implemented.

Geneva officials have claimed their plant will have "essentially the same effect on the appearance of the in Utah County as the EPA's plan."

The difference between the two plans is approximately four micrograms of pollution per cubic meter

of air, plant officials say.

"That is equal to four bees in the Astrodome," Geneva Superintendent Henry Hush said.

Geneva management and the Citizens Coalition to Save Geneva have urged citizens to write politicians and the EPA in support of the continued operation of the steel plant.

The state air quality board recently approved the same Geneva proposal rejected by the EPA. The action came after Utah Gov. Scott Matheson voiced support for the plant.

"Gov. Matheson's decision to go to a public hearing and his submission of the rest of the state clean air plan was important and appropriate since EPA and Utah's Steel industry are in apparent logjam over Geneva," Williams said.

Williams is traveling to Washington D.C. this week to meet with U.S. Steel officials.

Freight train crashes; over 40 passengers hurt

PHILADELPHIA (AP) — Screaming passenger trains went down the aisles and slamming into each other

when three packed commuter trains crashed in a chain reaction at the peak of the morning rush-hour Tuesday.

There were more than 400 injuries, most of them minor, authorities said.

"We were going at a good clip, 40 to 50 miles an hour," said R.C. Morrow of Glen Mills, a structural engineer who was one of the commuters on board.

"We started flying when the engineer hit the brakes. Most of the people hit their heads and faces on the seats in front of them."

There were no reports of fatalities in the 8 1/2-m. crash on the Media-West Chester line just beyond a curve in the southwest section of the city.

"Brace yourselves," shouted a motorman just before the impact.

The passengers, many dazed and dabbling their bloody faces with handkerchiefs, stumbled from the cars as police, wagons, ambulances and fire rescue vehicles rushed to the scene.

"A few people were trapped in the first smashed car but the firemen got them out quickly," Police Commissioner Joseph O'Neill.

The injuries were taken to 23 hospitals and an elementary school, the police commissioner said.

Conrail officials said as many as 1,200 passengers may have been riding the Imperial Valley line at the time.

Some passengers were injured, including bloody noses, sprained necks and some broken bones.

"We heard this big bang and ran out there with ice and paper towels," said

Ruth Wolf, a teacher at the Harrington Elementary School, a block from the accident scene. "Four times they were really shocked up."

A nine-car lead train developed a mechanical failure and a second train, which also had nine cars, stopped behind it, according to R.B. Hoffman,

an official of Conrail which operates the commuter service.

"The leading train got stopped and the second train hit it," Hoffman said.

"The third train got started behind the second train and the fourth hit the third before it could move away."

The force of the crash propelled the front of the third train into the rear of the second train which was just getting started.

"We have no idea what triggered the accident, but it was a major disaster in the vicinity where operational when I arrived at the scene."

The force of the crash propelled the front of the third train into the rear of the second train which was just getting started.

"We have no idea what triggered the accident, but it was a major disaster in the vicinity where operational when I arrived at the scene."

Major El Centro canal damaged by earthquake

EL CENTRO, Calif. (AP) — Officials said Tuesday that California's worst earthquake in eight years broke the major canal bringing water to this and border region, leaving some cities in the area with only a two-day water supply.

At least 91 million bales of alfalfa were destroyed, officials said.

The Imperial Valley line at the time.

Some passengers were injured, including bloody noses, sprained necks and some broken bones.

"We heard this big bang and ran out there with ice and paper towels," said

Ruth Wolf, a teacher at the Harrington Elementary School, a block from the accident scene. "Four times they were really shocked up."

Tidal waves hit French Riviera

NICE, France A rare tidal wave crashed Tuesday on a 60-mile stretch of the French Riviera, killing at least eight men and building a feasible beachhead, police said. Five other bodies were reported missing and feared dead on the popular Mediterranean resort coast.

An unidentified number of yachts and other pleasure craft were wrecked at many points along the Riviera.

The huge waves swept cars, bulldozers and trucks from the breakwater at Nice harbor into rising Mediterranean police reported. They said rescuers recovered eight bodies from the construction site and others were rescued. Two people were reported missing.

In the resort town of Antibes, the tidal wave swept two pedestrians into the sea and both were feared dead.

The French weather service said the tidal wave was felt from Marseilles to Cannes and was probably caused by an underwater landslide off Antibes.

Carter shows strength on trip

CHICAGO — President Carter, ending a two-day trip to the Midwest, continued his tour Tuesday and expressed delight over Mayor Byrne's near-endorsement of his re-election.

Carter came to Chicago on uncertain political ground with the Democratic leaders, but he returned to Washington with a surprisingly strong statement of support from Mrs. Byrne.

Before departing for Washington, the president held a "town meeting" with residents of suburban Delton, Ill. He assured the audience gathered in a high school gymnasium that inflation would ease by the end of the year.

And he criticized Cuba as "the most highly militarized country on Earth per capita." Cuba, he said, is "constantly interfering" with the affairs of other nations.

Carter said the Cubans have more than 45,000 troops in countries where "they have absolutely no business."

The United States will not move to establish normal diplomatic relations with the island nation until Cuba ends its involvement in the affairs of other countries and the United States President Fidel Castro releases "hundreds and hundreds, even thousands," of political prisoners.

Carter's business losses legal

WASHINGTON — A special counsel, declaring that "there is no evidence to establish that Jimmy Carter is a criminal," said Tuesday no prosecution is planned in connection with the financing of the president's family personal business.

Special Counsel Paul Curran, concluding a six-month investigation, said "no indictment can or should be brought against anyone" involved in nearly \$10 million in loans from the National Bank of Georgia to the peanut business.

Curran, in a 220-page report to Attorney General Benjamin Civiletti, said there was no evidence any of the money was diverted into Carter's 1976 presidential campaign. He also concluded there was no evidence of any criminal activities stemming from the loans.

However, Curran described a series of financial irregularities involving bookkeeping mistakes and inadequate collateral on the part of the Carter peanut warehouse, which has been heavily in debt.

Economists given Nobel Prize

STOCKHOLM — An American and a West Indian who teaches in the United States were winners of the 1979 Nobel Memorial Prize in Economic Science on Tuesday for their work to improve economic and "human" living conditions in the world.

The award, which carries a cash prize of \$100,000, was the fifth this year received by Americans, who have captured the lion's share of 1979 prizes as in past years. The award to the West Indians was the first ever given to an economist from the developing world, according to the Royal Swedish Academy.

Theodore W. Schultz, 77, of the University of Chicago, and Sir Arthur Lewis, 64, the West Indian native and British subject who teaches at Princeton University, "both have extensive practical and theoretical knowledge of economic problems and are deeply concerned about the need and possible ways in the world and the need for ways out of underdevelopment," the academy said in a citation.

US faces moderate recession

WASHINGTON — Treasury Secretary G. William Miller said Tuesday the nation will face a moderate recession, despite figures showing industrial production in September registered the biggest growth in four months.

"While the recession is expected to be moderate, the current economic outlook remains volatile, particularly in the energy and interest rate areas," Miller said.

"We cannot be certain as previously about the depth and severity of the economic slowdown," he said. But "newsmen" said that "there are few signs of a recession will be as bad as the 1974-1975 downturn which was the worst since the depression."

Employees sabotaged utility

SURRY, Va. — A jury on Tuesday convicted four former nuclear plant employees on felony charges of sabotaging a public utility. The two had admitted they sabotaged the Surry nuclear plant, saying they wanted to draw attention to safety standards.

The utility that operates the Virginia Electric and Power Co. plant here has estimated damage at \$1 million from the sabotage.

The jury deliberated about three hours before convicting William Kuykendall, 26, of Newport News, and James Merrill, 24, of Hampton on the single felony counts of damaging a public utility.

Slit skirts considered unacceptable at Y

Joana, men's dancin' and the new slit dress are not acceptable attire for BYU women, President Dallin H. Oaks said Tuesday's devotional assembly in the Marriott Center.

Oaks said BYU code at the assembly who were in violation of the dress standards to go home immediately after the assembly and change their clothes.

Oaks said slit skirts as well as jeans, blue jeans and men's slacks or trousers "reasonably comfortable with that kind of men's attire" as inappropriate for women students.

Speaking about the current all time dress and skirts, Oaks said, "It's embarrassing for me to say this, because people ought to be smart enough to know that the dress and grooming standards specify in violation of the dress standards to go home immediately after the assembly and change their clothes."

Oaks said he recently saw a girl on campus in a lovely dress, the seam of the dress was unsewn, almost up to the waist. He said he was shocked and embarrassed and it told his wife and daughter about the dress.

He was told by his family that this type of dress was the new style, but Oaks stated, "That is not the style at BYU."

He said he asked permission from Elder LeGrand Richards before the devotional to speak about the problem for a few minutes, and Elder Richards encouraged him to mention the problem because he too, felt it is important.

Elder Richards mentioned to Oaks, "A needs and thread don't cost very much."

Udall heads veterans' suit against US

LOS ANGELES (AP) — A group of veterans suffering from diseases they believe were caused by exposure to radiation during their military service filed suit Tuesday for \$1 million in damages.

The class-action suit seeks damages for all such veterans, said Toni Stuart, spokeswoman for the Southern California Clergy and concerned lay.

The suit is to be filed by former Interior Secretary Stewart Udall, now a private attorney in Washington, D.C. Udall is handling several related cases, including a suit on behalf of Utah civilians for radiation-related damages.

"The VA has recently relaxed its rulings in such cases," Ms. Stuart said. "In the past the burden has been on the servicemen and it's just been incredibly heavy red tape for them to get documentation that they were at the atomic tests."

The Central Intelligence Agency is looking for men and women with a career with a challenge and rewards to match.

Not everybody can work for the Central Intelligence Agency but you may be one of them. It takes intelligence, alertness, a willingness to take charge — more ability to run risks, and to work in unusual and uncomfortable places. Or takes the ability to work together effectively with many people and hold it all in a place of great responsibility.

Right now we need people with these backgrounds:

Computer Science
Communications
Engineering (civil, electrical, mechanical, nuclear)
Foreign Area Studies
Languages (Russian, Spanish, French, German, Italian, Japanese, Korean, Portuguese, Vietnamese, Thai, Vietnamese, Urdu)

Specialized training in the following fields: Agriculture, Business, Economics, Education, Engineering, Health, Law, Life Sciences, Medicine, Physical Sciences, Social Sciences, Technology, Transportation, and the Arts.

For more information, contact the Central Intelligence Agency, Human Resources Management Office, 1000 Wilson Drive, Suite 1000, Arlington, Virginia 22204. Or write to the Central Intelligence Agency, Human Resources Management Office, 1000 Wilson Drive, Suite 1000, Arlington, Virginia 22204.

If you're a veteran, please note that you won't be contacted with an ordinary job, just resume to the Central Intelligence Agency.

Personal Information: P.O. Box 1048, Springfield, Kansas 65901

The Central Intelligence Agency is an equal opportunity employer.

For more information, contact the Central Intelligence Agency, Human Resources Management Office, 1000 Wilson Drive, Suite 1000, Arlington, Virginia 22204.

Excess garbage

Landfill site sought for Provo

By CHARLES GRIFFITH

Provo City is running out of space to dump its garbage, and a new landfill site is being sought, a sanitation official said Tuesday.

M. Elroy Axel, Provo City sanitation director, said Provo is not the only city in the area with a landfill problem.

"The whole county is completely running out of space," he said.

He said gaining approval for a new landfill site could take months.

The present site is being sought, a sanitation official said Tuesday.

"The decision must be made through a lot of levels, such as the state and the EPA. A new landfill site must pass EPA specifications," he said.

Alex said the city's present landfill could still be used for another year and a half.

"Leland Gamette, administrative assistant to the Provo City Commission, said raising land costs could force the city to locate the site outside the city limits, possibly near Utah Lake."

Gamette said that if a distant site is chosen, city garbage vehicles would have to make trips to keep costs down.

"One method involves compressing the garbage, hauling it and dumping it on a semi to be hauled away to the landfill site," he said.

"This would cut down the number of runs needed to transport the garbage."

Alex said the city would probably not be able to start using a new landfill for at least another six months.

Jazz brings NBA to Utah

By JIM POTOSKI
Universe Sports Writer

It was a history making evening at the Salt Palace Monday night as the National Basketball Association was welcomed to Utah for the first time in a contest between the Utah Jazz and the Milwaukee Bucks.

A crowd of 7,721 was on hand, along with NBA Commissioner Lawrence K. O'Brien, to witness the first ever regular season NBA home game for the Jazz. But despite a game high 25-point performance by Pini Golan, the Jazz were manhandled in convincing fashion by the Bucks 121-107.

Jazz Coach Tom Nisenske said after the game, "our team has a long way to go. I saw some good things as well as bad things out on the floor tonight. Milwaukee just had more top players than we did, and once they got their running game going it was tough for us to stay with them."

The evening began in a fashion that is familiar to Utahns, Mayor Ted Wilson and Gov. Scott Matheson were introduced to the crowd as part of the first game ceremonies. After that, the Osmond Brothers (Merrill, Wayne, Alan and Jay) treated to midcourt to inspire the crowd with the singing of the National Anthem.

Commissioner O'Brien tossed the opening jump ball to officially begin the season for the Utah Jazz franchise. The Jazz, dressed in their home white with green and purple trim, started Marvich and Don "Duck" Williams in the backcourt. At center was second-year man James Hardy, who was flanked by forwards Adrian Dantley and Ben Poquette.

The Jazz and particularly Marvich came out firing in the first quarter, much to the delight of the home crowd. Pini Golan scored the first basket for the Jazz and led them to a 6-0 lead before the Bucks could score.

In the second quarter the hot shooting of the Jazz cooled off as the Bucks began to assert themselves. Buck forward Junior Bridgeman came off the bench to ignite his team and push them to a 63-57 halftime lead.

"We played a pretty good first half," said Coach Nisenske. "We outrebanded them by about 11 in that first half (20-18), but the big thing was we didn't keep our intensity. Next to San Antonio I think Milwaukee is the best running team in the league. When you don't play with a lot of intensity against a running team, you can get behind quickly."

Coming out in the second half, the Bucks outscored the Jazz 30-20 and took a commanding lead after

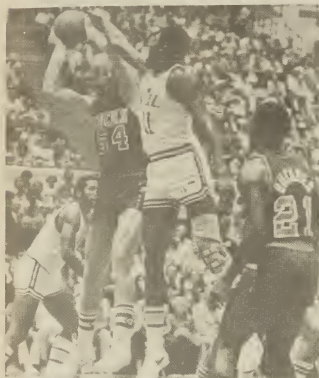

three quarters 98-77. Forward Marques Johnson guard Brian Winters were leading the way as the perennials Bucks were picking apart the Jazz.

The fourth quarter saw the Bucks continue to gun past the Jazz. Before the final buzzer, Junior Bridgeman had totaled 38 points on 12 of 20 shots.

The Jazz and collected a game high 10 rebounds. Despite outrebouncing the Bucks 44-38, Nisenske said his team is too soft in the middle. "I'm where we're not doing it," he said "and teamwork is not running through us for easy baskets."

"We look at this as an expansion team," said Nisenske. "Right now we have only three other NBA players, Marvich, Dantley and Bernard. We will try to build the team around them. These guys haven't played together at all, probably won't be until January (that the team) to sell and play together."

The Bucks shot a sizzling 59 percent from the field and the Jazz a respectable 48 percent. Points twenty of Utah star Greg Kume finished the two points, both on free throws that took a century mark for the Jazz.

Utah Jazz center James Hardy contends with Milwaukee center Kent Benson during Monday's tilt in the Salt Palace. The Jazz debut in Salt Lake City was a losing one, however, as the Bucks whipped the Jazz 121-107.

Volleyball slated for Y women

The BYU women's volleyball squad will play host to the No. 4 ranked team in the nation, UCLA, Friday at 8 p.m. in the Smith Fieldhouse. The Cougars will meet Lamar University of Texas at 8 p.m. Saturday.

BYU has two more home matches against UTEP Friday at noon and against New Mexico State Saturday at noon, both conference games. BYU Coach Elaine Michaels said, "The conference matches are most important to us. UTEP and New Mexico State are two of the best teams in the conference."

Scholarship

BYU's annual scholarship fund is now accepting applications for the 1980-81 year. The fund is open to all students who are currently attending or planning to attend BYU. For more information, contact the Office of Financial Aid, 200 South Main, Salt Lake City, Utah 84143.

Y Soccer Invitational gets underway tonight

By JIM POTOSKI
Universe Sports Writer

The eighth annual BYU Soccer Invitational will get underway tonight at Haws field, featuring competition among five WAC schools. The round-robin tournament runs Oct. 17-20. The winner will be crowned and awards presented at 5 p.m. Saturday.

BYU will be hosting the event that includes the other WAC teams—the University of Utah, Colorado State, New Mexico and Texas El Paso. UTEP comes to town as the defending champion of the tournament, having won in convincing manner last year in Provo. UTEP has a co-favorite this year, along with BYU.

BYU Soccer Coach Jim Dumas will lead his charges tonight against Utah at 6:30 p.m., and will be coming into the invitational with two morale-boosting wins over the weekend. "We have improved so much since the first of the season, now I feel we can win the tournament," said Dumas. "The boys are playing well and I know we are in good enough shape to play four games in four days."

Dumas credits the success program his players are undergoing for getting his team prepared to play. He said the fitness training has put his team into great shape. He figures the other teams might start feeling the exhaustion of playing so many games in a row.

UTEP is one of the favorites because the team is made up of all Mexican players with plenty of game experience. Dumas says they play very smart, and once they get lead they don't make mistakes. CSU is considered a darkhorse because the team comes into the action with a 0-1 record, the best of any team entered.

BYU comes into the tournament with high hopes of turning the season around. A poor start has hampered the

win the tournament," said Dumas. "The boys are playing well and I know we are in good enough shape to play four games in four days."

CSU is considered a darkhorse because the team comes into the action with a 0-1 record, the best of any team entered.

BYU comes into the tournament with high hopes of turning the season around. A poor start has hampered the

Soccers, but now Dumas feel his team is playing its best ball of the season. "We haven't taken more shots at the goal during the tournament," says Dumas. "Our defensive play is very critical because sometimes our boys don't communicate well and we give up easy goals. We can't allow that this weekend."

Randy Otteson, BYU's team captain, is confident about his team's chances. "We've been playing well lately; the team is continuing better. We're in such good shape now we're able to outrun the other teams all the time."

Pirates even Series at 3-3

BALTIMORE (AP) — Dave Parker and Willie Stargell, the power pair of Pittsburgh's lineup, drove in a pair of seventh-inning runs to ignite the Pirates' attack as they led the 1979 World Series at three games apiece by defeating Baltimore 4-0 in Tuesday night's sixth game.

It was the second straight victory for the Pirates and forced the series to a decisive seventh game Wednesday night. Scott McGregor, the winner in Game Three, will pitch for the Baltimore Orioles possibly against Jim

Bibby, who started Game Four but was not involved in the decision for Pittsburgh.

Left-hander John Candella and bullpen ace Kent Tekulve combined for the seventh shutout — the first of the Series — as Pittsburgh kept its chances good to become the fourth team to reach from a 3-1 game deficit and win a best-of-seven Series.

Since scoring six runs in the eighth inning of Game Three, the Orioles have fallen into a dreadful slump, managing just one run in 19 innings. Their slumbering bats proved fatal to starter

Jim Palmer, who pitched a creditable game, matching Candella's shutout through the first six innings.

Candella, who has been troubled by back and rib injuries, was lifted for pinch hitter Lee Maye leading off the seventh as the Pirates sought to get something going against Palmer. But Maye struck out as a capacity Memorial Stadium crowd of 53,709 roared its approval.

Soon, however, the Pirates silenced the crowd.

Speedy Omar Moreno, criticized for his poor hitting in earlier games, drilled the second of his three singles of the night to right field. Then, on a hit-and-run play, Tim Lincecum hit a ball up the middle. Orioles shortstop Kiko Garcia tried to field the ball and keep his foot on the base for the force play on Moreno. But he succeeded in neither, and the ball required through for a single.

That set the Pirates' table with big runs

Parker and Stargell coming up, where they drove in Moreno and Fol.

The Pirates doubled their lead in the eighth to set the stage for the seventh and deciding game.

undefeated Cougars turn to WAC race

Undefeated record... Cougars must turn their full attention to the conference race now. Particularly, they will be all out in the direction of winning Cowboys.

Although there were a number of outstanding performers for the Cougars, the most spectacular was split end Lloyd Jones. The 6-foot-4 junior caught seven passes for 103 yards, but no touchdowns. The Cougars also got some great catches out of half a dozen other receivers, including a 60-yard touchdown catch and sprint from tailback Scott Phillips. Phillips was brought down just shy of the goal line, and Lane punched it over two plays later.

Mar. Wilson came out of the game in the fourth quarter with 272 yards. It was Wilson's ninth game of 300 or more yards total offense, and ranked his NCAA record in that department one game higher.

One of the nation's leading sports magazines, Sports Illustrated, will feature a story in its Oct. 22 issue on the BYU State football game.

Speaking of BYU, Joe Jares of Sports Illustrated says "...this BYU improved its record to 9-4, the best start in 57 years of football and now has a real shot at its first undefeated season. Game 11 at San Diego State on Nov. 24 looks like the greatest hurdle the Cougars will have to face before the inevitable bowl game.

P.E. class 'takes the fat off' for achievements in leadership

By ANNE THORNTON
Universe Staff Writer

Whenever I run up the ball tower steps, the theme song runs through my mind," says Gordon Clay, a P.E. 177 student.

More than 2,000 BYU students are enrolled in P.E. 177, Fitness for Life. The course allows students to lead their own physical fitness program and rate themselves.

"Once I've been running, my appetite is reduced. I am not as tired," said Clay, a sophomore from Bill, Mass., majoring in English. "I relish the physical exertion."

At the beginning of each semester, students in the class determine their present physical fitness and percentage of body fat. From these results they write down fitness program, which includes whatever activities they choose. Their fitness contract is then read by the instructor.

Eighty-two percent of the students who have taken the course continue to participate in their chosen activity after finishing the class, according to a study in physical education department.

"I feel the reason the class is so successful is because students can select their own program," said William Stenquist, director of the P.E. 177 program.

Stenquist is one student who decided to start a running program after taking the class. "I decided to keep the fat off of my bodycompo," said Stenquist, a business major from Trenton, N.J. "I've become a better student who took the class in the class says she terminated her physical fitness

program after taking the class in 1978, but "I would like to start again." Miss Grover's selected activity for the class was 15 minutes of jumping rope five days a week.

Approximately half the P.E. 177 students choose jogging for their physical fitness contract, according to instructor Jerry Edgington. The rest combine one or more activities such as racquetball, football, swimming or jogging.

"When I'm running, I hate it," said Scott Chandler, a freshman from Boston, Mass., currently enrolled in the class. "But afterwards I feel I've done it." Chandler says he definitely plans to continue his running program after he completes the class.

Students who include jogging in their contract have the option of running outside or at the Smith Fieldhouse track.

"I like to run on the track because of the fun atmosphere," said Julie Baker, an elementary education major from Blythe, Calif., who runs 2.5 miles five days a week.

But student Gordon Clay says, "I think it's nicer to run outside. It gives running a more authentic value."

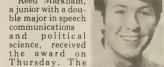

Clay also plans to try to continue his running program when the class is over.

George Morris, a BYU employee who was injured after a severe electrical shock in August, credits the Fitness for Life class as one of the reasons for his survival and remarkable recovery.

"I got myself in good physical shape and my heart was sound," he said.

Y student earns national award

At age 22, a BYU student has received the National Register of Prominent Americans and International Notables Award.

REED MARKHAM

Reed Markham, a junior with a double major in speech and communications and political science, received the award on Thursday. The award recognizes individuals for their outstanding achievements in leadership, along with their accomplishments.

Markham explained the association leaders of possible recipients of the award through the newspapers and the public. He said he was sent a form to fill out asking for all pertinent information about his achievements.

"I was surprised to receive the form," Markham said. Curiosity drove

him to seek more information in the library about the award.

"There were several prominent names listed as having received the award," he said. Governors, senators and presidents were listed as past recipients, he said, and added, "I feel honored."

Markham's leadership experience includes such positions as president of the BYU Student Development Association in 1978-80; executive assistant to the ASBYU president in 1975-79; an administrator in the Hill Cumorah Pageant in 1977-78; and public relations chairman in the Utah County project for the Utah Society for the Prevention of Blindness.

His honors include Who's Who in the West listed in 1979-80; national collegiate debate champion for BYU in 1976 and winner of the Washington Post national slogan/essay USA Award.

Markham is a member of the International Society of Law and many genealogical societies.

The Precision Haircut

(And why it might be right for you.)

If you hate the way your haircut disappears the day after, come to Command Performance where we specialize in the precision haircut.

Precision haircutting is our technique for cutting the hair in harmony with the way it grows. So as it grows, it doesn't lose its shape. And because the hair is cut to fall naturally, you don't have to keep fussing with it. Usually a shake of the head does it.

The precision haircut with shampoo and blow-dry costs just fourteen dollars for guys and gals. We also offer permanent waves, coloring, fringing and conditioning. No appointment is needed, just come in. And you'll see that precision is right for you.

Special Guest Appearance SORRENTINO

Director of Styling for Command Performance

FREE: Personal consultation on the latest hair styles and on the precision haircut.

Best for you.

Sorrentino will appear at 10 a.m. Friday, October 19 in the Grand Central Plaza, Orem, Utah.

Complimentary bottle of Command Performance Shampoo along with any service performed that day.

Command Performance

Grand Central Plaza 386 East 1300 South, Orem Utah Mon-Tue 9-6, Wed-Fri 9-8, Sat 9-6

ergler gets money from ball games

Ball game money at a local establishment was seized by police Saturday night. Provo police seized the money and pinball machines located at And Pizzeria, 284 N. West. Provo, were open and the money taken sometime Saturday night or early Sunday morning.

Adamson of the Provo Police Department said there was no point in trying to detect the money. "We don't know where the money was hidden until it was closed last night and we found it out the back door."

Damage to the machines is estimated at approximately \$500, he said.
